I am a passionate and innovative front-end developer specializing in React , with a keen eye for crafting visually appealing and user-friendly interfaces . Leveraging a strong foundation in modern web technologies, I am dedicated to creating seamless, responsive , and performant user experiences that elevate digital landscapes. Let's transform ideas into captivating web realities together.

## Skills

- **Languages :** JavaScript, Typescript
- **Library / Framework :** ReactJs, Redux , RTK Query, ExpressJs, TailwindCss, React Hook Form, React Query, Firebase, Shadcn
- **Database :** MongoDB
- **Tools / Technology :** Git, Github, RestApi, PostMan, JWT, Mongoose

## Featured Project

### Z-BOT ( MERN Application )

[Code](#) | [Live-site](#)

#### Application Features:

- **User Authentication & Security:** Implemented secure login using JWT and bcrypt, including email verification for new users.
- **Project & Task Management:** Developed modular task tracking, enabling users to create, update, and monitor project progress effectively.
- **Wallet & Expense Tracking:** Built a system to create wallets, track expenses by categories, and auto-update balances when expenses are deleted.
- **Expense Filtering:** Implemented filtering features to view monthly expenses and gain actionable insights.
- **Savings & Debt Management:** Created functionality to archive and delete historical savings and debt records for cleaner financial management.
- **Responsive Dashboard:** Designed and optimized a real-time dashboard for tracking financial and project metrics, compatible across devices.
- **Form Validation:** Integrated React Hook Form for dynamic form validation, ensuring input accuracy.
- **Theming Support:** Developed both dark and light mode themes, allowing users to choose their preferred interface experience.

**Technology Used:** React.js Tailwind Shadcn Node.js TypeScript Express.js MongoDB Mongoose Redux RTK Query JWT RESTful API
