Pet-Planetoid

React Tailwind Express MongoDB Firebase React-query

This web application is fully responsive and functional. You can effortlessly add posts featuring images of your pets and engage with them through likes and comments. Access to certain routes is protected, requiring sign-in and email verification. Within these protected routes, you can create posts, view others' content, and interact with them by liking and commenting. Additionally, you can explore users' profiles to see the posts and personal information they have shared.
